NEW! Signet 9900-1BC Batch Controller Introduction

Product Overview

We are introducing a second generation Signet 9900 SmartPro™ Transmitter featuring Batch Controller capabilities. The new 9900 Transmitter (Generation II) supports the same multiple parameters and now also Batch Systems. Customers have the flexibility to convert their 9900 Transmitter (Generation II) into a Batch Controller System by simply plugging in the new Batch Module and Relay Module, thereby maintaining the product's original intent of consolidating multiple platforms into one while increasing their service level and reducing inventory.

Customers can also purchase a complete 9900-1BC Batch Controller System, which includes a 9900 Transmitter (Generation II), a Batch Module and Relay Module for a factory configured solution.

Key Features

- Store up to 10 batch sizes for batching or blending a variety of liquid volumes
- Entry of different K-Factors for each batch
- Customize 10 batch names for easy distinction between batches
- Confirmation feature for preventing accidental batch starts
- Remote control wiring with start, stop and resume terminals for remote batch control
- A manual Batch feature for "topping off"

Availability

- Accepting orders immediately
- Initial lead time: 7 days
- Public launch on the web: 3/27/2013

Important Information Regarding Your Previous 9900 Transmitter

With the introduction of the 9900-1BC Batch Controller System, we will begin shipping the new (Generation II) 9900 Transmitters. A label will be added to the box for easy identification.

- For customers wishing to purchase the Batch Module (3-9900.397), Relay Module (3-9900.393) and the 9900-1P separately, please note, you must have a 9900-1P (Generation II) version. Previous 9900 Transmitter versions will not recognize the Batch Module (3-9900.397)
- Older 9900-1P are not upgradable to Generation II firmware
- Previously shipped 9900-1P Transmitters returned for credit or replacement will not be accepted

Target Applications

Targeted applications for this product include:

- Batch Process
- Filter Backwash Initiation
- Chemical Addition
- Canning and Bottling

We wish you success with selling this exciting new product over the upcoming years. Product information will be posted on the web March 27, 2013, at www.gfpiping.com.

If you have any questions or need additional information, please contact me or your ASM.

Signet 5600 Batch Controller Retirement

We are retiring the Signet ProPoint 5600 Batch Controller, due to limited supply of various components and rising cost of material. The retirement will be effective September 5, 2013, six (6) months from the date of this announcement or while supplies last.

Mfr. Part No.	Code	Description
3-5600	198 825 006	Batch Controller

5600 Batch Controller Alternative

To provide our customers with a direct replacement, we recommend the new SmartPro™ 9900-1BC Batch Controller System, which includes the same features as the 5600 Batch Controller plus several new features.

Warranty Return Plan

All 5600 Batch Controllers purchased on or before September 5 will be fully supported by our 2-year warranty. We will continue to fully support product repairs for non-warranty items and repairs for up to 2 years from stated retirement date.

Restocking

Any unsold 5600 Batch Controllers returned for credit or replacement will not be accepted.

We ask that you please communicate this information to all relevant parties. If you have any questions or need additional information, please contact me or your ASM.
