A Water Heater for Every Application

We know that your need for water heaters spans a wide range of applications. That's why F.W. Webb continues to grow its range of in-stock, industry-leading options from Bradford White.

For residential contractors working on new installations or replacement projects, we now offer a 65-gallon option in the **Bradford White AeroTherm® Heat Pump Water Heater family**.

Previously available only in 50- and 80-gallon sizes, this new mid-size model rounds out the line to provide an excellent series for homeowners seeking high-efficiency equipment over the standard 40-, 50- and 80-gallon electric models. With AeroTherm, you can assure your customers that they'll get ample hot water along with the energy- and cost-saving benefits important to today's energy-conscious consumer. An informative video explains all the features and benefits at bradfordwhite.com/aerotherm.

Contractors working on commercial projects are choosing the **Bradford White ElectriFLEX™ series**. With light-, medium- and heavy-duty electric models, the series offers solutions for all your commercial needs. The water heaters can easily be configured to meet your wattage, capacity, voltage and phase specifications using a Bradford White field conversion kit. This means you don't have to wait for a specific electrical configuration from the factory. What's more? A growing number of F.W. Webb locations have technicians on site to do the configurations for you. Simply outline your specifications and

contact your local F.W. Webb for pick up or delivery. We even offer 24-hour emergency service in many areas.

If you'd like to learn more about AeroTherm, ElectriFLEX or any other Bradford White water heater, please contact your local F.W. Webb.

Order Online!

Shop over 350,000 products from your phone, tablet or computer.

- Sort by category to quickly find products
- Check inventory by location
- Choose from delivery or store pick up
- Get account pricing 24/7
