Advantage® Gas Fired Water Boiler

Features
- A rugged cast iron heat exchanger design
- Available in four sizes
- Electronic vent damper
- Integral draft hood
- Taco 0015 3-speed circulator
- ASME safety relief valve
- Supply manifold
- T&P gauge
- Flame roll out switch
- Blocked vent switch
- Fuel Smart HydroStat® 3200 control
  - Temperature Limit Control: Designed for cold start boilers
  - Low Water Cut-Off: Provides protection against potentially dangerous low water conditions
  - Boiler Reset Control: Utilizes Thermal Targeting™ technology to conserve fuel by monitoring heating demand and establishing target boiler temperatures below the high limit setting
- Optional outdoor reset with sensor part #48-140
- Stainless steel burners
- USA made
- Limited lifetime warranty

The PurePro® Advantage Gas boiler is a residential, cast-iron, gas-fired water boiler designed for atmospheric draft into a conventional chimney. It is available in heating capacities from 59,000 to 147,000 BTU/hr. and is available for use with natural or LP gas.

The Advantage sets the standard for installer-ready gas fired boilers. With its limited lifetime warranty, the Advantage comes standard with intermittent ignition, a Taco 0015 3-speed circulator and HydroStat 3200 control which combines temperature limit control, low water cut-off, and boiler reset in one easy-to-use control. This user-friendly control is easily accessible, making the Advantage gas boiler simple to install and service. The integral draft diverter provides a low profile design, allowing the boiler to be installed in areas with low clearance.

Abundant, Rapid Hot Water Heating

PurePro offers a complete line of indirect water heaters to complement the Advantage Oil boiler. By utilizing the Advantage Oil boiler as its heat supply, the burner fires only when necessary and transfers heat from the Advantage boiler to the water heater through a highly efficient heat exchanger.

Specifications and dimensions are subject to change without notice.
- Net AHRI Water Ratings shown based on piping and pickup allowance of 1.15.
- Consult manufacturer before selecting boiler for installations having unusual piping and pickup requirements, such as intermittent system operation, extensive piping systems, etc.
