PurePro® Stainless Steel Condensate Return Systems
F.W. Webb’s Commercial & Industrial Pump Division offers the latest in condensate return systems. Our proprietary PurePro design starts with Grundfos stainless steel immersion-style pumps and a 304 stainless receiver tank. The concept is simple: our system offers flexibility in design coupled with the integrity of long-life stainless steel.

Why risk failure of a cast-iron system, the unsightliness of corrosion, the difficulty of maintaining side- or bottom-mounted pumps when there is an affordable stainless steel solution?

PurePro systems come in standard 25-, 50-, and 100-gallon receiver sizes.

Standard package offers the following features:
- Simplex (single pump), Duplex (double redundant pump) models
- Grundfos SPK, CRK, or MTR Pumps with stainless suction components and cast iron discharge head
- Flows to 90GPM and pressures to 85PSI
- Ease of maintenance with top-mounted pumps
  - Duplex systems allow one pump to be removed while operating the system
- Drain plug for thorough draining of receiver
- Standard mechanical duplexing float switch
- Flanges on tank bottom for secure installation
- Simple control panels with integral breakers and motor starters which can be tank-mounted or remotely wall-mounted

Custom condensate systems.

- Custom vacuum systems with integral eductor for use when gravity draining of a condensate system is not an option
- Standard PurePro systems are available to handle condensate temperatures up to 180°F. Higher temperatures are available; please contact our Inside Applications Team to discuss your application
- F.W. Webb’s Commercial & Industrial Pump Division has in-house CAD design capabilities to customize a system for your requirements. We routinely build systems to match unique footprints, to match up to existing piping, or for custom receiver capacities.
- Custom Vacuum PurePro Condensate Systems are available to accommodate installations in which the receiver cannot be installed at the low-point in a system

Options include:
- Front-mounted sight glass
- Bimetal thermometer
- Temperature transmitters
- Stainless steel pump discharge heads
- Electrical duplexing panels
- Variety of electrical options: single-phase and three-phase motors
Since 1866, F.W. Webb Company has served our customers by supplying critical products that help build, maintain, repair, and operate homes and facilities. Our 80+ wholesale locations, extensive inventory, and dedicated fleet of trucks extend our capabilities to every corner of the Northeast.

We support our delivery power with a network of sales professionals and specialists with deep expertise in the 14 industries we serve.

- Plumbing
- Heating
- HVAC
- Refrigeration
- Pipe, Valves & Fittings
- Building Controls
- Propane Gas Equipment & Parts
- Water Systems
- Commercial & Industrial Pumps
- Fire Protection & Fabrication
- Industrial PVF Specialties
- Thermoplastic Piping
- High Purity Process Components
- Process Controls

F.W. Webb’s fleet of over 250 trucks offers our customers the option to easily (and inexpensively) move large and cumbersome items without the challenges of commercial trucking.

Selection. Expertise. Solutions. We’ve Got It!
