
With over 75 locations throughout the Northeast, we have a great selection of products and the ability to get you what you need, when you need it. We feature manufacturers who are proven in the industry, such as Amtrol, American Granby, Boshart, Campbell, Charter Plastics, Goulds, Merrill, WaterSoft and PurePro.

But Webb Water Systems is much more than a source of great products. Our highly trained water system specialists have the expertise to help you solve problems, stay up to date with technology, and make sure your customers are satisfied. Selection plus expertise gives you the solutions you need to be competitive.

One of the ways we bring you exceptional value is through our exclusive PurePro® line of filters and cartridges. Please see the article below.

Thank you for giving us the opportunity to serve you.

PurePro®: the Professional’s Choice

PurePro® is F.W. Webb Company’s exclusive line of products for professional contractors. We certify each product that bears our private label. That means that every PurePro item is an unbeatable combination of quality, value, and warranty. If you have questions about a PurePro product you can bring it right back to your local F.W. Webb facility and we’ll make sure you are satisfied.

PurePro water filters and cartridges are some of our most popular products. Our 10” filters can be installed at point of use or whole house, while our 20” filters serve whole house needs. All of our PurePro filter systems offer great benefits, including:

- Black cap w/pressure relief button
- Pressure tested, high impact design
- Fast, easy cartridge changes with supplied wrench
- Mounting bracket included

To learn more about our featured products, please call the Webb Water Systems specialist nearest you (see page 4).

SPECIALIST SPOTLIGHT

Name: Anthony “Moose” Lashway
Territory: Albany, Queensbury and Plattsburg, New York
Years in industry: 12
Specializing in: Sewer pumps, well pumps, VFD, control systems, irrigation, water conditioning.
Ph: 518-796-8846

Amtrol Well-X1®

Amtrol Well-X1® combines the proven reliability of an Amtrol Well-X-Trol® next generation well tank with the convenience of constant pressure performance, at a much lower cost than most Variable Frequency Drive (VFD) systems.

Preassembled and ready to run, the Well-X1 works with your existing pump and wiring and is fast and easy to install. The unit also features the Guardian CPTM Digital Controller.

- Durable high-strength steel construction
- 7 year warranty
- Each unit pressure tested and digitally verified

Avoid OSHA’s Top Four Construction Hazards

The Occupational Safety and Health Administration provides these helpful suggestions:

1. Prevent Falls
   - Wear and use personal fall arrest equipment.
   - Install and maintain perimeter protection.
   - Cover and secure floor openings and label floor opening covers.
   - Use ladders and scaffold safely.

2. Prevent Struck-By
   - Never position yourself between moving and fixed objects.
   - Wear high-visibility clothes near equipment/vehicles.

3. Prevent Caught-In/Between
   - Never enter an unprotected trench or excavation 5 ft. or deeper without a protective system in place; some trenches under 5 ft. deep may also need such a system.
   - Make sure the trench/excavation is protected either by sloping, shoring, benching or trench shield systems.

4. Prevent Electrocutions
   - Locate and identify utilities before starting work.
   - Look for overhead power lines when operating any equipment.
   - Maintain a safe distance away from power lines; learn the safe distance requirements.
   - Do not operate portable electric tools unless they are grounded or double insulated.
   - Use ground-fault circuit interrupters for protection.
   - Be alert to electrical hazards when working with ladders, scaffolds or other platforms.
